

Together, improving life

GORE VASCULAR MASTERY eCAMPUS

designed for physicians in training
(fellows) in vascular disease

MEDICAL MASTERY SERIES

A new learning experience for physicians in training

Our European virtual and on demand modules will provide physicians in training with a broad curriculum covering the principles and best practices in the clinical application of the Gore vascular portfolio.

Online educational program

Online educational modules and interactive sessions will be run by experts across Europe in a flexible learning environment.

The program features case planning, film reading exercises and on demand streaming, providing a strong foundational knowledge and focus on clinical application of Gore vascular devices based on specific anatomy or disease state.

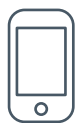

Available to interventional and surgical physicians in training (fellows) in the final years of fellowship.

Partnering to redefine
quality patient care.

Discussion forum with experienced physicians

This is a chance to interact with experienced physicians in the vascular disease space, learn the best clinical practice from them in specific pathological scenarios.

Case study structure

Topics will be split into three blocks. Each block delivered weekly, will contain relevant information about the case and will culminate in a series of multiple-choice questions to be answered.

A discussion forum will run throughout the topic so that delegates are able to discuss the aspects of the case with each other and the tutor.

The third and final block will finish with a live streaming session with the tutor, in which all the topic's content will be reviewed, and any outstanding questions answered.

Week 1	Week 2	Week 3
Block 1	Block 2	Block 3
Case presentations and treatment	Planning and discussion	Case resolution and discussion Streaming session with the tutor (one hour)

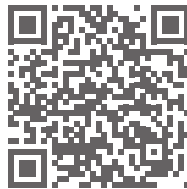

The continued education and support of future clinicians is at the core of our brand promise, *“Together, improving life”*

**Moving healthcare
forward together**

We are proud to continue ensuring that we do our part to provide physicians in training (fellows) and residents with learning opportunities focused on improved patient care and the advancement of medical technology and treatment.
